

Escape the Wind Tunnel

Escape the Wind Tunnel

It is your brother's 16th birthday. To celebrate, he has chosen to go indoor skydiving. Indoor skydiving is where people go inside a huge vertical wind tunnel. Gusts of wind, powerful enough to lift people off their feet, are blasted into the wind tunnel. It makes people look as if they have jumped from an aeroplane and are gliding through the sky.

Your brother dons his jumpsuit, helmet and goggles. Before the wind is turned on, you go in to wish him luck. Suddenly, you hear a deafening siren. A loud computerised voice says "Countdown initiated." You turn around to see the door slam shut.

You rush to the door, hammer on it and call for someone to let you out. The computerised countdown continues...

Escape the Wind Tunnel

Your brother's skydiving instructor appears on the other side of the door. "It's sealed shut from your side," she explains. "You need the code to get out," she says, gesturing to the side.

You see a keypad next to the door. "I see it!" you shout. "What's the code?" you ask desperately.

"I don't know it," answers the instructor. "But there are clues inside the tunnel. Find them and you can get out. But hurry! The countdown is on!" she warns.

Solve the clues and puzzles to discover the keypad code and escape the wind tunnel. The clues could be anywhere so you need to keep your eyes peeled and your mind sharp!

Escape the Wind Tunnel

The Rules

- Once you have find a clue, solve the puzzle.
- Write your answer down on your answer sheet.
- Once you have discovered the number for the keypad, check the answer sheet to discover if you can escape the wind tunnel!
